Task – 26

```python
# task - 26

# 1. Enumerate a python list and try to print the counter with the list value
my_list = ["India","New Zealand","England","Australia"]

for item in enumerate(my_list):
    print(list(item))

print('\n')

count_list = list(enumerate(my_list,1))
print(count_list)
```

output : -

```
[0, 'India']
[1, 'New Zealand']
[2, 'England']
[3, 'Australia']

[(1, 'India'), (2, 'New Zealand'), (3, 'England'), (4, 'Australia')]
```

```python
# 2. Enumerate a python tuple and try to print the counter with the tuple value

my_tuple = (15,7,9,"ten")
for var in enumerate(my_tuple,):
    print(var)
print('\n')
for count,var in enumerate(my_tuple,1):
    print(count,var)
```

output:-

```
(0, 15)
(1, 7)
(2, 9)
(3, 'ten')

1 15
2 7
3 9
4 ten
```
